# A SOLUTION TO RECORD AMBIENT CONTENT

Skyrec Ambient recording is a unique solution to capture background communications and the aural environment at air traffic control facilities.
The new the European Union Aviation Safety Agency's Air Traffic Management/ATM Recording Regulation requires all air traffic service providers to have a solution to record ambient sounds. Skyrec Ambient solution can help to identify operational issues, improve safety, and enhance training. The recordings can also be used for investigations of situations that require mandatory reporting.

— **Recording and Investigation Service**
— **A complete ambient recording solution**
— **Support for investigation of ATM incidents**
— **Training and Simulation exercise Capture**

BENEFITS

✓ **Meets new mandatory requirement for ATC / ambient recording**

✓ **A complete ACC, APP, TWR ambient recording solution**

✓ **Can be used for training purposes**

✓ **Easy integration with existing environment**
